All water customers south of the Yachats River are served by one main line crossing the river at the bridge. Constructing a 25 million gallon treated water reservoir at a location south of that bridge will increase the water reserves, provide more uniform flow and pressure distribution in the southern half of the water system and reduce interruptions in service if the transmission line crossing the river were damaged. Several potential sites have been identified. The Public Works Director and the City's engineers are performing a siting study to confirm the best location and elevation for the reservoir. This study will consider ease of access, design considerations and purchase price. The City Council shall, following a public hearing adopt formal "Findings of Fact" stating the selection rationale and identifying the proposed lot before purchasing any lot. Yachats City Charter requires authorization from voters for land purchase. Purchase price not to exceed \$100,000 and to be paid from existing reserves.</p> <p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p>
