Online Permit Purchasing Soon to be Offered by Lincoln County Planning Department

(Lincoln County - 10.12.14)

The Lincoln County Planning Department will soon be offering an online permit purchasing and tracking system called ePermitting. In December, contractors will be able to apply for and purchase building, plumbing, mechanical and electrical permits online and schedule inspections 24/7 by phone or online.

Lincoln County joins a growing list of local jurisdictions offering ePermitting services statewide to provide:

- Online access to apply, pay for, and receive permits 24/7
- Automated inspection scheduling by phone or computer
- Comprehensive permit tracking and data collection
- Mobile app for inspectors

If you have any questions about these upcoming services please go to the link below to help you get started. You can create an account and take advantage of the many training tools available to you.
