

VEGETABLE GARDEN

In the location on the lawn south of the Port Cochere and west of the most western fireplace, we propose to create an approximately 50 ft x 100 ft. vegetable garden. Please see attached photo. The garden will be a flat area that is cut into the slope of the turf. Walkways will be added so the garden is accessible to guests and visitors. A retaining wall will be constructed on the most northern part of vegetable garden plot. Please see location represented by box in blue picture. There is no greenhouse structure just raised beds.
