

# What's in your trunk?

Public Health  
Prevent. Promote. Protect.  
Lincoln County

## Disaster can strike any time, anywhere.

Whether traveling, at the store, or picking up the kids from school, the supplies in your car may be all you have in an emergency. Could your household survive for at least three days if your car and the supplies inside were all that you had?

## Build your kit for your needs.

- Update and refresh your kit at least once a year
- Consider including items to meet your special and unique needs (diapers, medications, mobility aids, etc.)

## Tips for safer trips:

- Prepare before you leave:
  - Pack additional supplies
  - Tell someone where you are headed, when you expect to arrive, and when you'll be back
  - Get your car serviced
  - Check the weather and road conditions
- During your trip:
  - Continue to monitor the weather and road conditions
  - Monitor local alerts and warnings
  - Gas up and replace your food and water supplies often
