**Subject:** Your Comprehensive

Your Comprehensive plan for our community and the children you fail to serve in Lincoln County outside City limits.

Yep Ono Husing and Clair Hall along with the retired commissioners and their council Wayne Belmont That's how you ruined our financial future in Lincoln County because we relied on the law and your comprehensive plan at the time we leased our facility but you all made sure we could not depend on anything written and still can't from the air and water statements you have presented in your plan. Now's there are taxing districts you claim to know nothing about and developments you know nothing about and we know you sure don't know our Lincoln County Water crisis or Air discharges so why not fast track another polluter like Juno? Wow blows my mind the greed! Why do the records fail to go beyond 2021?

**COMPREHENSIVE PLAN****1.0005 Introduction**

**11.0005 Introduction** The comprehensive plan is a statement of Lincoln County's overall policies regarding the nature of future growth and development in the County. This policy reflects a consideration of the County's problems and needs as well as its social, environmental and economic values. The purpose of comprehensive planning is to allow the public to make decisions in advance about the development of the County and the use and conservation of its resources. The resulting plan is a document upon which public agencies and private firms and individuals can rely so their decisions and investments can be made with confidence. People buying homes can do so, assured that their community will grow and develop in an orderly fashion. Businesses can invest in new sites, confident that they can be used for their intended purpose and that needed services will be provided. Public investments in water systems, sewer systems, schools, roads, etc., can be made in an orderly and cost effective manner.

(2) Air, Land and Water Quality: The air, land and water quality inventory details existing and potential sources of pollution in Lincoln County. Air quality in Lincoln County exceeds minimum standards set by the EPA. There are some waste discharges in Lincoln County affecting air quality; however air quality is remaining the same or improving slightly. Water quality in Lincoln County is described as generally good. Some moderate sedimentation problems exist on portions of some watersheds; in addition some periodic non-compliance with temperature standards occurs as a result of low summer flows and over appropriation. According to the inventory, air, land and water quality problems in the County are relatively minor and are currently adequately regulated by existing state and federal pollution control programs.

Please review my last communication from Water resource so you will be educated on future developments without water and sewer and failed contaminated wells serving our community drinks and dinner. See Lincoln County Health Drinking water testing from 1980 until closure at the Olalla Golf Course. To think we were not a health concern nor danger to our community.
